WORKS COMMISSION

LETTER OF TRANSMITTAL

RALEIGH, N. C.
JANUARY 1, 1951

HONORABLE W. KERR SCOTT, *Governor*:

DEAR GOVERNOR: In accordance with the provisions of section twenty-three, chapter two, of the acts of the General Assembly of 1921 (GS 136-12), I have the honor to submit herewith the eighteenth biennial report of the State Highway and Public Works Commission of North Carolina.

Respectfully,

HENRY W. JORDAN, *Chairman*

FOREWORD

This report, authorized by and for the General Assembly, summarizes the work done by the State Highway and Public Works Commission during the last two years. In conformance with the law it also presents audits covering the financial operations of the Commission for the two fiscal years.

The Biennial Report of the Prison Department of the State Highway and Public Works Commission is published separately and copies may be obtained by addressing the Director of Prisons, Highway Building, Raleigh, N. C.

THIRTY-FIVE YEARS OF ROADBUILDING

1915-1950

A BRIEF HISTORY OF THE NORTH CAROLINA STATE HIGHWAY AND PUBLIC WORKS COMMISSION SINCE ITS FOUNDING IN 1915

North Carolina's Highway Commission supervises the largest state systems of roads in the United States.

The Tar Heel road network embraces over 64,000 miles of double-lane boulevard, regular hard-surfaced highways and remote rural roads, spreading over mountains and rolling hills, through cities and villages, sandy lowlands and swamps.

Only three other states—Virginia, West Virginia and Delaware—have direct jurisdiction over all rural roads as well as highways. North Carolina's 64,000 miles exceed the mileage managed by highway departments in these states and all the others in the Union.

This diffuse responsibility makes roadbuilding extra big business for North Carolina's Highway Commission. In addition to regular construction and maintenance, the Commission in the summer of 1949 undertook a special \$200,000,000 secondary roadbuilding program, using funds derived from a bond issue.

By statute the Highway Commission has a task which includes the building of roads with its own forces, the supervision of road construction in charge of private contractors and the maintenance of the State's extensive mileage of roads and highways.

To do this job it employs about 8,000 regular and from 3,000 to 5,000 temporary workers. The size of the payroll varies with the roadbuilding season.

The Commission itself comprises a chairman and ten members, one from each of ten designated highway divisions. The Governor appoints both chairman and commissioners for four-year terms. Working directly under the commissioners is a State Highway Engineer. He supervises a staff consisting of engineers who handle equipment, maintenance, construction, roadway planning, bridges, statistics and planning, materials and testing and roadbuilding activities in ten highway divisions. All subordinate positions of an engineering nature come under the authority of these department heads. Heading administrative departments are a general counsel, an auditor, director of safety, purchasing and prisons, a compensation officer and a public information officer.

The Commission derives its income from automobile use taxes and federal aid, especially the gasoline tax, but the expenditure of these funds comes under the careful scrutiny of the Legislature, the Budget Bureau and the personnel department. Each biennium the Legislature authorizes the expenditure of certain funds for road construction, improvement and maintenance. Each expenditure must be approved, as it is made, by the Budget Bureau, and this strict supervisory system effectively safeguards the management of a budget which reached \$85,201,539 during the 1948-49 fiscal year.

Poor Roads of 1915

The North Carolina Highway Commission came into being in 1915, but the organization of that day was small and inconsequential. Along with the rest of the nation, North Carolina was emerging from the horse-drawn vehicle era into the automobile age. The State had a loosely-connected road system, but it provided poor facilities even for 1915 travel. It was totally inadequate for the revolutionary development of automotive transportation just ahead.

Prior to 1915 all road construction and maintenance in the State was handled on a county level. County officials collected road funds, mostly property tax levies, and county employees, contractors and local prisoners performed the actual roadbuilding work. Earlier, landowners had the responsibility for building and maintaining roads running through their property. Landowners furnished the labor themselves or funds to hire it.

By 1915 the State had progressed sufficiently so that all its counties participated in roadbuilding activities to a degree, and some had fairly adequate roadbuilding organizations. Mecklenburg fell in this category. Roads there were considered among the best in the State by the second decade of the Twentieth Century.

In 1915 public sentiment brought about a widespread desire for a real State Highway network adequate to meet the needs of the day. Taking heed of this sentiment, the 1915 General Assembly authorized an appropriation of \$10,000 and the appointment of a six-member State Highway Commission. The original members of the Commission were Governor Locke Craig, chairman; Dr. Joseph Hyde Pratt, secretary; Prof. W. C. Riddick, Prof. T. F. Hickerson, Col. Benehan Cameron, E. C. Duncan and Guy V. Roberts. Obviously, the limited funds provided by the State, coupled with other restrictions, forced the Commission to confine its activities to education and promotion.

The Legislature empowered the Commission to extend aid to counties in employing competent engineers and laying out a State-wide system of roads and highways. But the Commission actually did its biggest job in the promotional field. It succeeded in convincing the people of the State that they needed good roads.

The next step came in 1917 when the General Assembly enacted a measure authorizing the Highway Commission to administer all funds derived from motor vehicle registrations. (North Carolina levied no gasoline tax, but the number of automobiles was growing steadily.) The law also said that 70 per cent of all registration fees collected in the counties should go to the county road funds, and actual supervision of roadbuilding continued to be vested in the counties.

Meanwhile, Congress passed the first Federal Aid Highway Law which provided for the allocation of federal funds for highway purposes in the various states.

Road Interest Grows

The General Assembly of 1919 ratified North Carolina's first far-reaching Highway Act. It created a Highway Commission composed of a full-

time chairman and three commissioners and provided that all motor vehicle registration fees collected in the State be used for the construction and maintenance of roads. The Legislature also decreed that road funds provided by the Federal government be matched, one-fourth of the funds to come from the State and one-fourth from the county where the work was done.

This significant legislation immediately stimulated roadbuilding. During 1919 and 1920 the Commission and the counties completed 200 miles of new roadway and placed 650 more under construction at a cost of more than \$12,000,000.

By 1921 the State pushed for even greater speed in roadbuilding and the result was the passage of the Doughton-Connor-Bowie Act, probably North Carolina's most important piece of highway legislation. It provided for a nine-member Highway Commission headed by a full-time chairman and served by a full-time State Highway Engineer who would supervise all roadbuilding work in the State. It gave the new Commission direct jurisdiction over a State highway system of about 5,500 miles and provided for a serial bond issue of \$50,000,000, the proceeds from which were to be applied to road construction. The Legislature also levied a tax of one cent per gallon on gasoline, and gave the Highway Commission broad powers of determining which roads should comprise the highway system. It also instructed the Commission to build a system of roads connecting all the county seats and principal towns of North Carolina.

This was a big assignment and a radical departure in State policy. History shows that the issuance of bonds and the creation of a State road system paid off tremendous dividends. North Carolina became the "Good Roads State" by stepping out ahead of her neighbors. The part good roads played in the economic development of North Carolina during this period can never be measured, but it was sizeable.

Three months after the adjournment of the Legislature, the new Highway Commission had employed more than 3,000 men and bought one million dollars worth of equipment. The roadbuilding era had begun in earnest.

Even as early as 1923 the results of the State's first major venture in roadbuilding seemed satisfactory. The General Assembly of that year voted to float an additional bond issue of \$15,000,000 and hiked the gasoline tax from one to three cents a gallon. In 1925 the Legislature floated a third serial bond issue of \$20,000,000 and added another cent to the gasoline tax. In 1927 it issued \$30,000,000 more bonds, raising the total outstanding to \$115,000,000.

These were the last road bonds issued until Governor Scott's \$200,000,000 secondary road bond issue of 1949. During the intervening period all road funds came from current revenue. In 1929 the Legislature raised the gasoline tax from four to five cents per gallon and set aside the revenue from the additional cent tax as a county road fund distributed on the basis of area and population.

The State Takes Over County Roads

North Carolina stepped out ahead of the nation again in 1931 by placing the State's entire county road system—some 45,000 miles—under the exclusive jurisdiction of the Highway Commission. This was a revolutionary change in policy and its effects are still being felt sharply almost twenty years later. Inability of the counties to fulfill road obligations for rural people during the depression years and general sentiment favoring more centralized control of county roadbuilding played a part in this change. It gave the Highway Commission a 54,000-mile instead of a 8,798-mile road system, and it laid the foundation for the philosophy that the State is obliged to furnish all-weather roads for all of its citizens, not just certain groups.

At the same time the Legislature authorized the use of county prisoners on the road system and raised the gasoline tax from five to six cents, stipulating that the fifth cent, which had been allocated to county governments, be allocated to the Commission.

In 1933 the Legislature placed the entire State Prison System under control of the Highway Commission and gave it authority to use the labor of 3,650 prisoners on the roads. This made North Carolina one of the very few states in the Union whose state prison system was directly linked with its state road system.

Economic conditions limited the activities of the Commission from 1931 to 1935. During the years 1934-1937 the Legislature diverted \$4,000,000 from the Highway Fund to the General Fund to help the State through the economic crises of those years. In 1947 the Legislature banned any further diversions of this nature.

The decade from 1931 until the beginning of World War II saw the State's highway system steadily expanding as increased use of roads brought more gasoline tax income. The war years brought highway construction to a virtual standstill and helped build up the pressure on the Highway Commission which ultimately culminated in the Better Schools and Roads campaign of 1949.

Better Rural Roads Demanded

As far back as 1941 it was observed that the excellent system of State highways built with bond funds in the Twenties would need overhauling at the end of the war. At the same time the Commission realized there was growing need to devote more attention to roads in the rural sections of North Carolina. The growing demands for better farm-to-market roads increased after two hard winters left most of the unpaved mileage of the 63,000-mile road system virtually impassable. North Carolina had assumed responsibility for its 45,000 miles of county roads in 1931. Rural people were now demanding something more than token maintenance for this road system.

Governor R. Gregg Cherry's administration launched an ambitious farm-to-market road program just after the war ended. More than 3,000 miles of secondary roads were paved from 1945 to 1949, but this merely

scratched the surface. Although highway revenue had continued to rise as automobile use increased, costs of roadbuilding rose even higher. Funds were insufficient to launch an intensive county road improvement program and at the same time meet the demands of the primary road system.

The only answer to this problem, in the opinion of newly-inaugurated Governor W. Kerr Scott (1949-52), was another road bond issue like those of the Twenties—this time aimed at building and improving the secondary road system exclusively. In a special message to the 1949 Legislature Governor Scott proposed a \$200,000,000 rural road bond issue which would help hard-surface 12,000 miles and improve another 35,000 miles of secondary roads. The Legislature passed Senate Bill No. 52 providing for such a bond issue if approved by a vote of the people. Following a spirited State-wide campaign spearheaded by the Governor, the bond issue carried in a special election on June 4, 1949.

The bill provided that the State's six-cent gasoline tax should be raised to seven cents on January 1, 1950, and that the proceeds from this extra cent be used to help pay interest on the money borrowed. The first \$50,000,000 segment of bonds were sold by the State on September 28, 1949 at an average interest rate of 1.57 per cent. Immediately the Highway Commission launched its secondary roadbuilding program in every section of the State. An additional \$75,000,000 in bonds were issued in March 1950 and sold at a still lower rate of 1.52.

The Road Bond Act authorized specific allotments of the \$200,000,000 for each of the State's 100 counties based on population, area and road mileage. Ten per cent of the total amount was authorized for use by the Commission for equalization purposes anywhere in the State and early in the program the Commission borrowed a portion of the fund for purchasing roadbuilding machinery. A large portion of this loan already has been repaid to the Secondary Road Fund.

By July 1, 1950—one year after the program began—the Highway Commission had finished approximately 20 per cent (or one-fifth) of the hard-surfacing and 16 per cent of the stabilization set as a goal by Governor Scott. During the first 18 months of the Scott Administration the Highway Commission paved 2,375.8 miles of secondary roads.

At the end of the fiscal year, \$32,226,407.82 of the \$125,000,000 in bond funds already made available for the secondary program had been spent and \$78,103,082.88 allocated.

At the same time the Commission continued its primary road improvement program with regular highway funds. Governor Scott allocated \$8,600,000 from highway surplus funds for expenditure on eight of the state's most critically needed primary highway projects. The Commission transferred over \$8,000,000 from secondary road funds to general maintenance and primary highway construction in view of the large sums of bond money available for use on county roads.

During the two-year period covered by this report the State Highway Commission spent a total of \$202,905,684 for all highway construction and maintenance purposes. This exceeded by far expenditures in any previous biennium.

Of the \$117,704,144 spent by the Commission during the 1949-50 fiscal year, \$32,226,407 came from road bond sources. Another \$4,974,000 from the bond fund went to purchase equipment for use on the secondary road program. Regular gasoline tax collections showed a continuous climb during the year as the greatest volume of traffic in history used North Carolina's roads.

The Commission finished the biennium with a \$5,379,267 unallocated surplus and a total credit balance (including allocated funds) of \$19,820,444.

STATE SECONDARY ROAD FUND

JUNE 30, 1950

The State Secondary Road Fund was created by an Act of the 1949 General Assembly and a bond issue of \$200,000,000 was authorized by Chapter 1250 of the 1949 Session Laws and approved by a majority vote at a special election held on June 4, 1949.

Bonds have been issued to date in the amount of \$125,000,000 and commitments or allotments as of June 30, 1950 amounted to \$83,107,593.72, leaving an unallotted balance of \$41,892,406.28.

The Cash Balance in the Fund at June 30, 1950 amounted to \$87,769,081.34, and in addition thereto, \$2,277,755.42 was due from the State Highway Fund to apply as a partial reimbursement for equipment purchased out of the Equalization Fund. The latter amount represents the surplus earned through equipment rentals by the Equipment Department during the year.

STATEMENT OF RECEIPTS AND DISBURSEMENTS

YEAR ENDED JUNE 30, 1950

RECEIPTS:

Bonds Sold—Chapter 1250 of 1949		\$ 125,000,000.00	
Accrued Interest and Premium on Bonds:			
Premium	\$ 358,425.00		
Accrued Interest	711,471.87	1,069,896.87	
TOTAL RECEIPTS		\$ 126,069,896.87	

DISBURSEMENTS:

Accrued Interest and Premium on Bonds Transferred to State Highway Fund	\$ 1,069,896.87		
Bond Sale Expense	29,510.84		
Equipment Purchased	4,975,000.00		
Expenditures on Secondary Road Construction Projects	32,226,407.82

Raleigh, North Carolina

HON. HENRY W. JORDAN, *Chairman*
North Carolina State Highway and Public Works Commission
Raleigh, North Carolina

Sir:

We have made an examination of the accounts and records of the

**NORTH CAROLINA STATE HIGHWAY AND
PUBLIC WORKS COMMISSION
Raleigh, North Carolina**

for the fiscal year ending June 30, 1949, and submit herewith our report.

Cash—\$30,475,988.32:

We reconciled the cash balance at June 30, 1949, with the records of the state treasurer. We examined in detail checks for one month and had occasion to examine numerous cash entries recorded during other months. Our examination disclosed no irregularities.

Accounts Receivable—\$14,228.73:

The total accounts receivable consist of four items as follows:

Cash advances to employees amounting to \$17,650.00, represent advances for travelling and emergency purposes. These advances are secured by a surety bond approved by the Commissioner of Insurance.

State Departments and sundry accounts amounting to \$51,467.42, represent charges for services rendered or sale of supplies made by the various units of the State Highway and Public Works Commission. From our examination it appeared that all of these receivables were for current charges and collectible.

Motor Vehicle Bureau—Imprest Fund in the amount of \$15,000.00, represents an advance to the Motor Vehicle Bureau for the purpose of making refunds and the clearing of worthless checks. This account was verified with the records of the Motor Vehicle Bureau.

The credit balance of \$69,888.69, included under the caption as advance on group insurance, represents insurance premium payments collected from employees, which have not been paid out as premiums to insurance companies.

U. S. Public Roads Administration—\$16,625,352.50:

This balance represents the amount receivable from the U. S. Public Roads Administration under the program of Highway Construction. The total amount receivable consists of two items, as follows:

Balance due on Projects Let amounting to \$12,037,699.57, represents the estimated amounts receivable from the Federal Government as their share of the cost of construction projects for which contracts have already been let. The liability for these contracts is reflected in the encumbrances.

Balance due on allocations amounting to \$4,587,652.93, represents the amount allotted to the State Highway and Public Works Commission under the Federal Aid Program. As contracts are let, the Federal Government's share of the estimated participation cost is transferred from this account to the account of "Balance due on Projects Let."

Inventories—\$3,445,430.65:

Physical inventories were taken at the various storage points by Highway Commission employees. The original inventory sheets were forwarded to Raleigh and examined by us. We verified in detail price extensions and footings; however we did not examine the actual physical inventories.

Materials and supplies are priced at an average cost price for inventory purposes.

The reserve for inventories amounting to \$316,702.25, at June 30, 1949, represents the unused valuation reserve set up at June 30, 1931, against obsolete materials and supplies.

Encumbrances—\$32,919,386.64:

This balance represents the obligations of the Highway Fund as of June 30, 1949 on highway construction and betterment projects on which the contract has been let or on which the work has been started.

During the course of our examination, we had occasion to examine a number of contracts and estimates on work completed. We found that all such payments were properly approved by the engineering division.

Reserves—\$666,702.25:

The item making up this total with the exception of the reserve for equipment replacements amounting to \$350,000.00, have been discussed under the assets to which they apply. This reserve of \$350,000.00 for motor equipment replacements was set up during the war period when normal replacements could not be made.

Surplus—\$16,974,911.31:

The surplus as shown on the balance sheet includes both Federal and State Funds. This amount represents a book surplus and should not be interpreted as cash surplus. An analysis of the surplus is shown on Schedule 13, attached hereto.

Exhibit "B"—Estimated Revenue and Receipts

This Exhibit reflects the total revenue accruing to the Highway Fund for the fiscal year ending June 30, 1949.

We did not verify the revenue collected by the Department of Motor Vehicles and Revenue Department which accrues to the Highway Fund for the purpose of this audit. This revenue will be verified and reported in our audit of the Department of Motor Vehicles and Revenue Department.

The item of filing fees collected by the Utilities Commission amounting to \$7,642.25 was verified with the records of the Utilities Commission. The item Sundry Revenue amounting to \$4,989.35, consists of discount on Maintenance material stores purchased and cancellation of old outstanding checks.

All the revenue on this Exhibit is shown on a strictly cash basis except the Federal Aid Revenue. The Federal Aid Revenue represents the amount allocated by the Federal Government during the year for their share of projects on which they are to participate. This revenue amounting to \$527,265.32 was verified by inspection of the certificate direct from the U. S. Public Roads administration.

Exhibit "C"—Appropriations and Allotments

This Exhibit shows the appropriations, allotments and the unexpended balance of appropriations.

Exhibit "D"—Statement of Allotments and Liquidations

This Exhibit reflects the encumbrances at July 1, 1948, the allotment credits and the liquidation of encumbrances during the fiscal year under review, together with the encumbrances at June 30, 1949.

Exhibit "E"—Per Capita Cost of Prisoners

The Per Capita Cost of Maintenance and Support of Prisoners is shown in detail on this Exhibit. The per capita, per day cost for the year under review was \$1.7703 as compared with \$1.722 for the previous year.

The Prison Department was charged with all expenditures pertaining to the operation and was credited with receipts from the sale or transfer of farm and manufactured products, as well as the allowance for prison labor. The allowance for prison labor was increased from \$2.50 per day to \$2.75, effective September 1, 1948. Upon this basis, for the year under review, the Prison Department's operation reflected a surplus of \$58,259.34, as compared with a deficit of \$217,980.19 in the previous year. The surplus was credited to State and County Maintenance.

Other Exhibits

Attached hereto as Exhibit "F", is a statement of the cumulative expenditures for construction of State Highways from March 4, 1921 through June 30, 1949.

Attached hereto as Exhibit "G", is a statement of the cumulative expenditures for construction of County Highways from July 1, 1931 through June 30, 1949.

General

Our examination consisted primarily of a verification of the assets and liabilities of the Highway Fund at June 30, 1949, as shown on the attached balance sheet and a general review of operations for the fiscal year ending on that date. During the course of our examination, we had occasion to examine a number of original entries and other data supporting financial transactions, all of which appeared proper. We did not, however, examine every financial transaction recorded in the records during the year under review. We had occasion to refer to data in the files supporting original entries and found that all such data had been properly filed and the files were in excellent order.

We wish to express our appreciation to the personnel of the Commission for the many courtesies extended us during the course of our examination.

Respectfully submitted,

HENRY L. BRIDGES, *State Auditor*

HON. HENRY W. JORDAN, *Chairman*
Board of Commissioners
N. C. State Highway and Public Works Commission
Raleigh, North Carolina

Sir:

We have made an examination of the financial accounts and records of the

**NORTH CAROLINA STATE HIGHWAY AND
PUBLIC WORKS COMMISSION
Raleigh, North Carolina**

for the fiscal year ending June 30, 1950, and submit herewith our report. For the purpose of convenience, we have divided this report into three sections.

SECTION I

Regular Highway Fund

Attached hereto, as Exhibit "A", is the balance sheet of the regular Highway Fund, subject to the following comments.

Cash—\$41,087,112.95:

This amount represents the total cash balances with the State Treasurer of both the General Cash account in the amount of \$37,827,613.98 and the special and separate cash account carried with the State Treasurer as "Reserve for Secondary Road Fund Debt Service" in the amount of \$3,259,498.97. This special account is carried with the State Treasurer in accordance with the provisions of the Public Laws of 1949, creating the Secondary Road Fund.

We reconciled the cash balance at June 30, 1950 with the records of the State Treasurer. We examined in detail checks for one month and had occasion to examine numerous cash entries recorded during other months. Our examination disclosed no irregularities.

Accounts Receivable—\$40,018.79:

The total accounts receivable consist of five items as follows: Cash advances to employees amounting to \$24,800.00, represent advances for traveling and emergency purposes. These advances are secured by a surety bond approved by the Commissioner of Insurance.

State Departments and sundry accounts amounting to \$9,592.80, represent charges for services rendered or sale of supplies made by the various units of the State Highway and Public Works Commission. From our examination it appeared, that all of these receivables were for current charges and collectible.

Motor Vehicle Bureau-Imprest Fund in the amount of \$15,000.00, represents an advance to the Motor Vehicle Bureau for the purpose of making refunds and the clearing of worthless checks.

The credit balance of \$27,527.67, included under the caption as advance on group insurance, represents insurance premium payments collected from employees, which have not been paid out as premiums to the insurance companies.

U. S. Public Roads Administration—\$17,890,370.86:

This balance represents the amount receivable from the U. S. Public Roads Administration under the program of Highway construction. The total amount receivable consists of two items as follows: Balance due on Projects let amounting to \$12,503,392.33, represents the estimated amounts receivable from the Federal Government as their share of the cost of construction projects for which contracts have already been let. The liability for these contracts is reflected in the encumbrances.

Balance due on Allocations amounting to \$5,386,978.53, represents the amount allotted to the State Highway and Public Works Commission under the Federal Aid Program. As contracts are let, the Federal Government's share of the estimated participation cost is transferred from this account to the account of "Balance Due on Projects Let."

Inventories—\$3,809,962.10:

Physical inventories were taken at the various storage points by the Highway Commission employees. The original inventory sheets were forwarded to Raleigh and examined by us. We verified price extensions and footings; however, we did not examine the actual physical inventories.

Materials and supplies are priced at an average cost price for inventory purposes.

The reserve for inventories amounting to \$316,702.25, at June 30, 1950 represents the unused valuation reserve set up at June 30, 1931, against obsolete materials and supplies.

Encumbrances—\$40,062,562.63:

This balance represents the obligations of the Regular Highway Fund as of June 30, 1950, on highway construction and betterment projects on which the contract has been let or on which the work has been started.

During the course of our examination, we had occasion to examine a number of contracts and estimates on work completed. We found that all such payments were properly approved by the engineering division.

Reserves—\$2,944,457.67:

The Reserves making up this total consist of three items as follows: The reserve for inventories at June 30, 1931, amounting to \$316,702.25, has been discussed under the assets to which it applies.

The reserve of \$350,000.00, for motor equipment replacements was set up during World War II period, when normal replacements could not be made.

The reserve due the Secondary Road Fund for equipment amounting to \$2,277,755.42, represents the rentals earned for equipment used by the various units. This amount was set up as a reserve to apply as a partial reimbursement to the Secondary Road Equalization Fund for equipment purchased.

Surplus—\$19,820,444.40:

The surplus as shown on the balance sheet includes both Federal and State Funds. This amount represents a book surplus and should not be interpreted as a cash surplus. An analysis of the surplus is shown on Schedule 14, attached hereto.

Exhibit "B"—Estimated Revenue and Receipts

This Exhibit reflects the total Revenue accruing to the Highway Fund for the fiscal year ending June 30, 1950.

We did not verify the revenue collected by the Department of Motor Vehicles and Revenue Department which accrues to the Highway Fund for the purpose this audit. This revenue will be verified and reported in our audit of the Department of Motor Vehicles and Revenue Department.

The item filing fees collected by the Utilities Commission amounting to \$9,424.00 was verified with the records of the Utilities Commission. The item sundry revenue amounting to \$3,446.38, consists of discounts on maintenance material stores purchased and miscellaneous refunds.

All the revenue on this Exhibit is shown on a strictly cash basis except the Federal Aid Revenue. The Federal Aid Revenue represents the amount allocated by the Federal Government during the year for their share of projects on which they are to participate.

Exhibit "C"—Appropriations and Allotments

This Exhibit shows the appropriations, allotments and the unexpended balance of appropriations.

Exhibit "D"—Statement of Allotments and Liquidations

This Exhibit reflects the encumbrances at July 1, 1949, the allotment credits and the liquidation of encumbrances during the fiscal year under review, together with the encumbrances at June 30, 1950.

Exhibit "E"—Per Capita Cost of Prisoners

The Per Capita Cost of Maintenance and support of prisoners is shown in detail on this Exhibit. The per capita, per day cost for the year under review was \$1.7528, as compared with \$1.7703, for the previous year.

The Prison Department was charged with all expenditures pertaining to the operation and was credited with receipts from the sale or transfer of

farm and manufactured products, as well as allowance for prison labor. The allowance for prison labor was \$2.75 per day. Upon this basis, for the year under review, the Prison Department's operation reflected a deficit of \$5,216.78, which was charged to State and County Maintenance.

SECTION II

State Secondary Road Fund

The State Secondary Road Fund was created by an Act of the 1949 General Assembly and a bond issue of \$200,000,000.00 was authorized by Chapter 1250, Public Laws of 1949, and approved by a majority vote at a special election held on June 4, 1949.

The General Assembly of 1949 amended the existing law by levying an additional one cent per gallon gasoline tax, which shall be applied exclusively to the payment of the principal and interest on the Two Hundred Million Dollar State of North Carolina Secondary Road Bonds. The law further specifies that this additional one cent per gallon gasoline tax shall be set aside as received in each fiscal year to the credit of a special account in the State Highway Fund. Revenue accruing to this account is shown on Exhibit "B" of the Regular Highway Fund.

Attached hereto, as Exhibit "G", is a Balance Sheet of the Secondary Road Fund.

The Cash Balance remaining in this Fund at June 30, 1950, amounted to \$87,769,081.34.

Accounts receivable in the amount of \$2,277,755.42, represents the surplus earned through equipment rentals by the Equipment Department during the year under review and is due from the Regular State Highway Fund to apply as partial reimbursement for equipment purchased out of the Equalization Fund.

Bonds have been issued at June 30, 1950 in the amount of \$125,000,000 and commitments or allotments amounted to \$83,107,593.72, leaving an unallotted balance of \$41,892,406.28, and is so shown on Schedule 18, attached hereto.

SECTION III

Cumulative Expenditures for Construction County Highways

Attached hereto as Exhibit "H" is a statement of the cumulative expenditures for construction of County Highways listed by Counties, reflecting the amounts expended as of June 30, 1950 from both the Regular Highway and the Secondary Road Funds.

General

Our examination consisted primarily of a verification of the assets and liabilities of the Regular Highway and Secondary Road Funds at June 30, 1950, as shown on the attached balance sheets of the two Funds and a general review of operations for the fiscal year ending on that date. During

the course of our examination, we had occasion to examine a number of original entries and other data supporting financial transactions, all of which appeared proper. We did not, however, examine every financial transaction recorded in the records during the year under review. We had occasion to refer to data in the files supporting original entries and found that all such data had been properly filed and the files were in excellent order.

We wish to express our appreciation to the personnel of the Commission for the many courtesies extended us during the course of our examination.

Respectfully submitted,

HENRY L. BRIDGES, *State Auditor*
